ELLIOTT'S BULB OFFERS ~ 1929
From Now Until ~ July 1st ~ Not Later

WHY ELLIOTT BULBS ARE SO GOOD

*Every Year Our Experts Travel 8,000 Miles
to Make Your Garden Better*

THE Elliott Nurseries have never been satisfied with the risks of importing bulbs through middlemen. To avoid that we do two things. First, we specify that all orders from this bulb catalog be in by July 1st, each year. That causes no inconvenience to our friends and enables us to know, shortly thereafter, just what our demand for various bulbs will be.

With this concrete information in hand, a group of Elliott experts go to Holland in person. There they visit all the large growers and all of the important private growers who have specialized in certain flowers for generations. And not only do these experts fill your orders at first hand direct from the original source—but they also test and examine every order right on the ground so that we get nothing but perfect bulbs.

This Makes Elliott Bulbs Cheaper

THIS direct method of purchasing, first of all, insures healthy bulbs of perfect breed. Secondly, it cuts down their cost to us—and to you!

Buying direct, we buy for cash. That is a saving. Testing our bulbs, we discard the poor ones before they are shipped, not after. This means no loss from waste that you must ultimately pay for. When bulbs are imported in the usual way, they pass through the hands of two dealers before they reach you, thus doubling in price. When you buy through Elliott's you not only get the advantage of our immense quantity purchases, but you cut out at least one middleman's cost, losses and profits.

Elliott Bulbs are Tested Twice

YOU are buying perfect bulbs that have been tested right where they grow by our own men—at a distinct saving in price.

This, however, is only half of the story. Not only are your bulbs examined and tested in Holland—they are re-examined and re-tested when they arrive here. Conditions here are different, and we must be satisfied that the bulbs that were perfect over-seas are just as perfect in this country. We prove that they are before we ship them to you!

The thousands and thousands of bulbs that are constantly grown at the Elliott Nurseries are your guarantee of a *double test*—and double satisfaction.

Anybody Can Grow Elliott Bulbs

AS a consequence, Elliott bulbs give results that frequently amaze gardeners of long experience. They are easy to grow because they are perfect bulbs to begin with. No skill or training is required to make a success of anything offered you in this catalog. All you need do is follow the simple directions that come with each order—and if you were a medal-winning garden expert, you could hardly get better results.

You can't do that with ordinary, hit-or-miss bulbs. But you *can* do it with Elliott's hand-picked, twice-tested, guaranteed bulbs imported direct to your own order!

*Whether you've grown flowers before or not, Elliott Bulbs will
give you splendid flowers for a very small outlay in
money—and next to no attention!*

F RONTIER days are over and we Americans have taken our place as a cultivated people. Having made the country prosperous, we now intend that it shall also be beautiful. Henceforth, to maintain one's home grounds in drab ugliness is a confession of crudity.

For the enthusiast schooled in garden lore, there is, of course, a wealth of material with which to experiment. But Americans are a practical people, and busy. They want results, and with a minimum of trouble.

As plant material, bulbs are so matchless and so splendid that the expert, with everything to choose from, still must use them. They are so easy to grow that even from cheap inferior bulbs tolerable results are assured. Where one will give a little attention to securing truly high class bulbs the results are amazing, nor are the finer bulbs reserved for some favored few. For four generations, Elliott's have supplied these superior bulbs as cheaply as lesser houses furnish second-rate ones.

It would seem no longer necessary to tell intelligent people of the value of Dutch bulbs. Consequently, in this book, we will confine ourselves to telling how the various classes may best be used. While it is true that much of the fun of gardening consists in working out new and original combinations, most of us want to be told how to start.

Plan Illustrating Best Positions In which to Plant Elliott's Dutch Bulbs

- A—DARWIN, BREEDER and HYBRID TULIPS
- B—COTTAGE TULIPS
- C—SINGLE EARLY TULIPS
- D—DOUBLE EARLY TULIPS
- E—CROCUS NATURALIZED IN LAWN
- F—SCILLA CAMPANULATA
- G—HYACINTHS
- H—NARCISSUS
- I—SEVEN HARDY BULBS FOR NATURALIZING

THE home of the average American consists of some combination of four elements, namely, the house, the garage, the lawns and the ornamental plantings. The arrangement of these elements may vary as required by the site, but some arrangement of all of them there must be, or the place is incomplete. The skill with which these elements are combined is the measure of the good taste of the owner and of his contribution to the pleasant aspect of the community.

The plantings fall naturally into three groups, namely, the foundation plantings, the boundary plantings and the garden plantings.

On great estates where there is room for everything, skillful landscape architects plan and trained gardeners execute special bulb gardens for the gratification of their owners. The busy American, however, wants to know, with as little fuss as may be, how to use bulbs to best advantage on his own grounds. It is the purpose of the diagram on this page to give you this information.

While this diagram may not precisely represent your own property, nevertheless, you will have all of the elements here shown and will easily identify them. Thus you can determine where and how to use the various classes of bulbs to the best advantage.

NAMED TULIPS

Elliott's Hand Made Mixtures

Each Mixture Guaranteed to Contain 10 Distinct Varieties—All Named In This Catalog

DARWIN TULIPS

he USUAL method of preparing a mixture of anything is to take so many of this, so many of that and so many of the other, throw them in a pile, and mix them with a wooden shovel. A mixture so made is a perfectly honest mixture, but what an individual customer gets out of it is obviously the result of chance.

FOR ADVANCE ORDERS ONLY, we will prepare five hand-made mixtures. Our new bulb warehouse, the finest thing of its kind in the world, contains a thousand bins. Every day, as required, ten employees will count out five bulbs each from ten named stocks and dump the fifty bulbs into one bin, repeating the operation until all of the bins are filled. EACH BIN WILL CONTAIN FIFTY BULBS AND NO MORE. Consequently to every customer who orders fifty bulbs of one of these mixtures, WE GUARANTEE THAT HE WILL RECEIVE TEN NAMED VARIETIES, five bulbs of each variety. We further guarantee that all the varieties used are offered in this catalog. We cannot afford, at this price, to pack the bulbs under separate names nor allow the customer to specify what varieties shall be included. The choice must be left entirely to us.

Customers wishing less than fifty bulbs will have their orders counted from one of these bins. EXCEPTING WHERE THE ORDER CALLS FOR BULBS IN MULTIPLES OF FIFTY, we cannot guarantee that they will be filled with

equal quantities of the ten named varieties, but it is probable that they will be. To the best of our knowledge and belief no other bulb house in the world has the facilities to prepare mixtures as fine as these and it will probably be years before anyone else can attempt it.

They Don't Grow Better Bulbs than Elliott's

GARDEN OF DARWIN TULIPS

The Princely Darwin Tulips

(FLOWER IN LATE MAY)

WHILE it may be true that the meek shall inherit the earth, the world at present belongs to the aggressive; and only the self-confident succeed. In the vegetable kingdom, no plants appear more sure of themselves than the princely Darwin Tulips. Giants in size, they send forth massive flowers with a range and richness of color to dim the glory of the sunset.

No weaklings are these Tulips, to be coddled and sheltered from the buffets of a hard world. They can stand alone. They should, therefore, be massed in borders in front of the shrubbery plantations, in solid beds along the boundary line, in front of a hedge if there be a hedge, or in a special garden of their own.

FOR SUGGESTIVE LAYOUTS SEE PAGES 4 AND 10

FOR THE HAND MADE MIXTURE SEE PAGE 5

For best effects, allow four bulbs for each square foot to be planted.

Tulip Garden Group 1

DARWIN TULIPS

The analysis of over a thousand letters asking for advice received in 1928 revealed that 91% of our customers writing had an area of 42 square feet to plant with Darwin tulips and required 165 bulbs. The average planting was a bed about 2½ feet wide by 17 feet long. Almost invariably these customers wanted to know what they could plant in the tulip bed after the tulip bulbs had finished blooming.

For the convenience of people who do not care to go to the trouble of writing a special letter, we recommend Darwin Tulip Group 1 and Darwin Tulip Group 1x. Either group will plant any bed having an area of about 42 square feet as, for example: a bed 2½ by 17 feet or a bed 4 by 10½ feet. Either group will plant a circular bed 7½ feet in diameter. Included in each group will be sufficient seeds to sow on the beds after the tulips are through blooming and so provide summer bloom.

Darwin Tulip Group 1

- A—50 Darwin Tulips Gretchen.
1 pkt. Balsam Camellia-Flowered Salmon.
- B—65 Darwin Tulips Mme. Krelage.
1 pkt. Balsam Camellia-Flowered Malmaison-Pink.
- C—50 Darwin Tulips Europe.
1 pkt. Nigella, Love-in-a-Mist.

Special Price \$7.45

Darwin Tulip Group 1x

- A—50 Darwin Tulips Farncombe Sanders.
1 pkt. Balsam Camellia-Flowered Salmon.
- B—65 Darwin Tulips Sophrosyne.
1 pkt. Balsam Camellia-Flowered Malmaison-Pink.
- C—50 Darwin Tulips Afterglow.
1 pkt. Nigella, Love-in-a-Mist.

Special Price \$9.65

Note: The seeds will not be delivered until spring when the 1929 crop is ready for planting.

Elliott's Twice Tested Bulbs Are Safe

BREEDER TULIPS WITH SHRUBS IN BACKGROUND

The Aristocratic Breeder Tulips

(FLOWER IN LATE MAY)

TULIP PANORAMA

he SPLENDOR of any prince depends on the brilliancy of his court and no prince has a more brilliant peerage than Princely Darwin Tulips have in the Breeder varieties. Even the Prince himself can boast no such richness of pastel hues. While the Darwin Tulips flame, the Breeder Tulips glow with a softer radiance. Marvelous color effects are possible by combining the two with skillful judgment.

The Breeder Tulips are identical with the Darwins in size, shape, time of bloom, etc.—in every respect excepting in color,—and should be used in the same manner.

For best effects allow four bulbs for each square foot to be planted.

FOR SUGGESTIVE LAYOUTS SEE PAGES 4 and 14.

Tulip Garden Group 2

BREEDER TULIPS

Of the hundreds of Breeder Tulip plantings which we recommended in individual letters to our customers last year none have proved as popular as the two combinations shown on this page. Either of these combinations will plant an area of 49 square feet or a circle 8 feet in diameter. For annual plants to follow the Breeder Tulips we particularly recommend the New Giant Strain of Pentstemon and three packets of seed will be included with each group order.

Breeder Tulip Group 2

- A—60 Breeder Tulips Copernicus.
1 pkt. New Giant Strain Pentstemon.
- B—65 Breeder Tulips Cardinal Manning.
1 pkt. New Giant Strain Pentstemon.
- C—70 Breeder Tulips Viking.
1 pkt. New Giant Strain Pentstemon.

Special Price
\$12.90

Breeder Tulip Group 2Y

- A—60 Breeder Tulips Panorama
1 pkt. New Giant Strain Pentstemon.
- B—65 Breeder Tulips Don Pedro.
1 pkt. New Giant Strain Pentstemon.
- C—70 Breeder Tulips Prince Albert.
1 pkt. New Giant Strain Pentstemon.

Special Price
\$16.25

Note: The seeds will not be delivered until spring when the 1929 crop is ready for planting.

DOROTHY ELLIOTT INSPECTING NEW HYBRID TULIPS

And Now You Have the Rainbow to Play With The New Hybrid Tulips (FLOWER IN LATE MAY)

TULIP HONEYMOON

THE possible color combinations to be secured by proper combining of the Darwin and Breeder Tulips were so lovely that perhaps the ultimate in color effects might seem to have been reached. Yet to the expert in color something was lacking. Pure yellow and pure white and their numerous modifications were denied him. The artist gardener was demanding yellow and white. For a generation or more the Dutch tulip breeders endeavored to produce pure yellow and pure white in the Darwin and Breeder groups until it seemed that the quest was hopeless. Finally, one Hybridist, perhaps more alert or more resourceful than the rest, tried crossing the Darwin and Breeder tulips with outside groups. The result was an immediate success, for his hybrids retained all the qualities for which the Darwin and Breeder tulips are famous, deriving from the outside groups only the long sought pure yellow and pure white. Now, by combining the new Hybrid tulips with the Darwin and Breeder tulips, you may command color effects as unlimited as your imagination.

FOR SUGGESTIVE LAYOUT SEE PAGE 4

For best effects allow four bulbs to each square foot to be planted.

TULIP MENTOR

TULIP ROSABELLA

For the convenience of our customers who may wish to plant circular beds, we are giving the diameters of circles from 3 to 12 feet. The diameters are approximate since any area greater or less than $\frac{1}{2}$ square foot is not considered since it will have no bearing on the number of bulbs required.

A circle 3 feet in diameter has an approximate area of $7\frac{1}{2}$ square feet.

A circle 4 feet in diameter has an approximate area of $12\frac{1}{2}$ square feet.

A circle 5 feet in diameter has an approximate area of $19\frac{1}{2}$ square feet.

A circle 6 feet in diameter has an approximate area of 28 square feet.

A circle 7 feet in diameter has an approximate area of $38\frac{1}{2}$ square feet.

A circle 8 feet in diameter has an approximate area of 50 square feet.

A circle 9 feet in diameter has an approximate area of $63\frac{1}{2}$ square feet.

A circle 10 feet in diameter has an approximate area of $78\frac{1}{2}$ square feet.

A circle 11 feet in diameter has an approximate area of 95 square feet.

A circle 12 feet in diameter has an approximate area of 113 square feet.

MASS PLANTING OF ENGLISH GARDEN TULIPS

Old English Garden Tulips, The Patricians of Bulbs

(FLOWER IN MAY)

DIGNITY, grace, and charm—the attributes for which we all strive in unending effort, are seldom acquired except by generations of careful breeding. In the vegetable kingdom, too, dignity, grace, and charm are the result of breeding. No plants have it in greater measure than the Old English Garden Tulips (Cottage Tulips); but then, few, if any, plants have been so carefully bred for so many centuries. Like all patricians, Old English Garden Tulips (Cottage Tulips) are more effective against a suitable background. Plant them, therefore, not in beds or borders by themselves but in the open spaces in your shrubbery or among your perennials. Particularly, plant them among your roses where they will lend their charm to the rose plants until the roses are ready to bloom for themselves.

Tulip Garden Group 3

COTTAGE TULIPS

As part of the great Red Cross Bulb Shows which we held some years ago, we planted every Cottage Tulip group it was possible to make. The visitors to these shows voted two of them as being the most attractive and the most effective and these two groups we are illustrating on this page. For annual plants to follow the tulips for summer bloom, we recommend a combination of *Arctotis Grandis* and *Hunnemannia Fumariaefolia*, the Giant Tulip Poppy. The bulbs included in these groups are sufficient to plant an area of 40 square feet or a circle 7½ feet in diameter.

Cottage Tulip Group 3

- A—100 Cottage Tulips Orange King.
1 pkt. *Arctotis Grandis*.
B—100 Cottage Tulips Bouton d'Or.
1 pkt. *Hunnemannia Fumariaefolia*.

Special Price \$9.95

Cottage Tulip Group 3W

- A—100 Cottage Tulips Inglescombe Pink.
1 pkt. *Arctotis Grandis*.
B—100 Cottage Tulips Inglescombe Yellow.
1 pkt. *Hunnemannia Fumariaefolia*.

Special Price \$8.85

Note: The seeds will not be delivered until spring when the 1929 crop is ready for planting.

WALK BORDERED WITH TULIPS WHITE HAWK AND COULEUR CARDINAL

The Gay and Friendly Early Tulips

(FLOWER IN APRIL)

EARLY Tulips are among the first spring flowers to bring us glowing color after the drab barrenness of winter. They make the first brightness about the house since the gay colored bulbs of Christmas were taken down. Early Tulips are friendly flowers and are best used at the entrance of the home along the entrance walk or grouped on either side of the front door. So planted, they bring warmth and cheer to the owner, wave a merry greeting to the guest, and seem to wish happiness and prosperity to every passerby.

All Single Early Tulips may be grown in the house during the winter months. See page 25.

FOR SUGGESTIVE LAYOUTS SEE PAGES 4 AND 25

FOR THE HAND MADE MIXTURE SEE PAGE 5

For best effects allow five bulbs for each square foot to be planted.

Tulip Garden Group 4

SINGLE EARLY TULIPS

By the simple process of measuring up a hundred or so of them in the neighborhood of Pittsburgh, we find that the average dwelling has a space of about 40 square feet to plant with Single Early Tulips in the manner illustrated on the accompanying photograph and diagram. If four generations of handling tulips is of any value, the two combinations shown below are as fine as it is possible to make. Either of the groups contain enough bulbs to plant a circle 7½ feet in diameter. For summer planting to follow the tulips we specially recommend the use of Balcony Petunia White and Balcony Petunia Violet Blue.

Single Early Tulip Group 4

- A—96 Single Early Tulips Joost von Vondel.
1 pkt. Balcony Petunia Violet Blue.
B—104 Single Early Tulips Lady Boreel.
1 pkt. Balcony Petunia White.

1 pkt. Balcony Petunia White.

Special Price \$16.75

Note: The seeds will not be delivered until spring when the 1929 crop is ready for planting.

The New Mendel Tulips for Those Who Would Be Exclusive

(FLOWER IN LATE APRIL)

THE Mendel Tulips are the newest things in tulips and the present vogue among smart European Society. Truly they would seem to have a great future. The strain is so new and the bulbs so scarce that they have not been widely tested in America and, consequently, little is known yet of how they will behave here. On a recent trip to Holland, Mr. Elliott saw them for the first time and selected a few of the best varieties which, in his judgment, are worth trying under American conditions.

All Mendel Tulips may be grown in the house during the winter months.

For best effects allow five bulbs for each square foot to be planted.

The Double Varieties of Early Tulips

(FLOWER IN APRIL)

WHETHER one shall plant the single early Tulips or the double early Tulips depends on whether one prefers delicate grace or massive strength. Of the two the double Tulips are heavier and more sturdy and last longer in bloom. The color range of both groups is almost identical. However, the double Tulips are about a week later coming into bloom.

Like the single early Tulips, the double kinds are best grouped at the entrance, though because of their heavier texture they are very effective planted in beds by themselves. They will thrive with very little attention and are, therefore, specially recommended for cemetery planting.

All Double Early Tulips may be grown in the house during the winter months. See Page 27.

FOR SUGGESTIVE LAYOUTS SEE PAGES 4 AND 27

FOR THE HAND MADE MIXTURE SEE PAGE 5

For best effects allow five bulbs for each square foot to be planted.

	Per Doz.	Per 100		Per Doz.	Per 100

Tulip Garden Group 5

DOUBLE EARLY TULIPS

Checking up on the curved entrance walks which have become so popular in the last few years, we discovered that, on the average, such a walk has an area of 24 square feet which will accommodate Double Early Tulips as indicated on the accompanying diagram. If the walk is the older type straight walk, the area will be, on the average, twice as great and require twice as many bulbs. For the curved walk the following combinations are specially desirable. Either group contains sufficient bulbs to plant a circular bed $5\frac{1}{2}$ feet in diameter.

Double Early Tulip Group 5

A—65 Double Early Tulips Tea Rose.
1 pkt. Snapdragon Large Flowered Amber Queen.

B—70 Double Early Tulips Imperator Rubrorum

1 pkt. Snapdragon Tall Copper King.

Special Price \$8.55

Note: The seeds will not be delivered until spring when the 1929 crop is ready for planting.

Double Tulips Are Ideal for Breeding

A Hint of What the Future Holds

THE tulips, which your grandmother or even your mother grew, are for the most part no longer seen in your garden having long since been supplanted by better varieties. The great Dutch Hybridists are still working upon tulips and it is likely that your grandchildren will not plant the early tulips which now give you so much joy. A new race of tulips which promises ultimately to replace the entire early group is being developed.

This new race will have the form and the substance of the Darwin group, will force easier and earlier than the single early group and will bloom nearly as early in the garden. The color range promises to be more gorgeous than either the Darwin or the early group.

It probably will be years before these new tulips will be available for general use.

In the meantime, you may be interested to know what your children's children are likely to plant.

For best effects allow five bulbs for each square foot to be planted.

TRIUMPH TULIPS

	Per Doz.	Per 100
Acral. Soft lilac, with white edges on outer petals, pointed flower. \$0.20 each.....	\$2.00	\$15.00

PARROT TULIP FANTASY

The Gorgeous Parrot Tulips

For those who tire of the conventional

(FLOWER IN EARLY MAY)

THE Parrot Tulips are not only unlike all other tulips but they are unlike all other flowers whatsoever. They are utterly unconventional. Apparently scorning all restraint, they seem to catch the spirit of the modern vogue in the arts as no other flowers do. They take their name from their color markings, which suggest the foliage of the parrot. The new variety, "Fantasy" is unquestionably the most gorgeous Tulip in the world.

For best effects allow five bulbs for each square foot to be planted.

Late Show Tulips For Auld Lang Syne

(FLOWER LATE IN MAY)

*I*N the garden of your great-grandmother grew the Late Show Tulips. In the garden of her great-grandmother also they grew. Indeed, for centuries there were no other kinds of Tulips to grow.

The Late Show Tulips belong to the olden times and may be a little embarrassed against a background of ultra-modern architecture. They belong, like certain kinds of period furniture, to Tudor and Queen Anne dwellings.

For best effects allow five bulbs for each square foot to be planted.

NATURALIZED PLANTING OF THE POET'S NARCISSI

Narcissus~Northwestern Grown~Carries the Unqualified Elliott Guarantee of Quality

AS all our customers know, following the Quarantine Order of the Department of Agriculture prohibiting the importation of Narcissus, we have refused to recommend Narcissus or give any guarantee whatever concerning the quality. In the meantime, we have been carrying on extensive experiments with bulbs grown in every section in America, where such bulbs could be produced. We have at last satisfied ourselves that the double nose bulbs grown in the Northwest, up close to the Canadian line, are at last equal, in every respect, to the finest imported stocks and this opinion is confirmed by the experience of numerous independent investigators.

As the result of our careful and extensive experiments we are again offering Narcissus in quantity. We guarantee the bulbs offered in this catalog are Northwest grown and we guarantee the quality in every respect.

Plant Narcissus on the edges of your shrubbery or in your rockeries or among your perennials and if your property includes a bit of orchard or other space where the grass need not be cut until sometime in July, naturalize Narcissus there. In reasonably favorable conditions they will last indefinitely and bloom year after year, always provided that the foliage is not cut off until it has turned brown.

All Narcissus may be grown in the house during the winter months.

FOR SUGGESTIVE LAYOUTS SEE PAGES 4 AND 34

SINGLE NARCISSI

(Trumpet Daffodils)

For best effects allow four bulbs for each square foot to be planted.

	Per Doz.	Per 100

The Pearl. Creamy-white; very elegant flower.	2.50	18.00
Van Sion. Golden yellow, large flower on strong, erect stem. One of the best for early forcing. Also good for naturalizing.	2.50	18.00

Banks Pay 4% We Pay 5% for Cash

THE Narcissus industry in the Northwest being now on a firm basis and its future assured, the better Northwestern growers naturally refuse to sell their second sized or round bulbs. They can hardly be blamed. For round bulbs are much more valuable to them as propagating stock than they can be on the open market, and of course, these growers want to enlarge their plantings as rapidly as possible.

There are other sections of the country, however, where an attempt has been made to establish the Narcissus industry and where it is now certain that no success can be hoped for. Many such growers are anxious to liquidate their stocks and withdraw from business. As a consequence, round or second sized bulbs, from sections other than the Northwest, are on the market.

On request we shall be glad to quote on round or second sized Narcissus, but only with the understanding that these bulbs are sold without any guarantee whatever.

Narcissus Garden Group 6

The beautiful naturalized Narcissus group suggested on this page occupies a space of about 32 square feet. If planted with the Poet's Narcissus, as shown, it will require 192 bulbs. It can be made even more interesting by combining the Poet's Narcissus with Narcissus Victoria in equal quantities though it must be remembered that the Victoria Narcissus requires more space and if the two are used a smaller quantity of bulbs will be required.

Narcissus Group 6

- A—192 Narcissus Poeticus.
 1 pkt. Larkspur, Exquisite Pink Improved.
 1 pkt. Poppy Munstead's New Art Shades.

Special Price \$17.25

Note: The seeds will not be delivered until spring when the 1929 crop is ready for planting

Narcissus Group 6T

- A—75 Narcissus Victoria.

 1 pkt. Poppy Munstead's New Art Shades.

Special Price \$17.95

Spring's First Flower~The Crocus

(FLOWERS IN MARCH)

BETWEEN the melting of Winter's last snow and the blooming of Spring's first tulip, a flat and barren landscape is an ordeal for sensitive people to endure. And it is quite unnecessary when Crocuses are available to fill in the void. It would seem almost foolish to deprive oneself of the joy that Crocuses bring. Even if one were indifferent on one's own account, isn't it selfish to refuse to add beauty to the world when beauty may be had at so little cost?

Crocuses, the earliest of all spring flowering bulbs, are also the cheapest; and there is nothing else to take their place. If the foliage is not cut off they will last indefinitely. They should be used for edging tulip beds or any garden bed or shrub border. Scattered through the lawn, they will gleam like jewels against the verdant background.

FOR SUGGESTIVE LAYOUT SEE PAGE 4

FOR THE HAND MADE MIXTURE SEE PAGE 5

For best effects allow seven to nine bulbs for each square foot to be planted.

Keep a Copy of Your Order

The Orderly Hyacinth

(FLOWER IN APRIL)

AT a time when the members of smart European Society vied with each other in embellishing their garments with all the brilliant colors of the rainbow, Beau Brummel appeared in a simply cut costume of black and white, and won undying fame as the best dressed man of his day. Against the brilliancy of his contemporaries he made a contrast that was unforgettable.

Contrast you must have in your plantings, if they are to be made really delightful. Contrast, of course, does not mean that beauty must be balanced against ugliness. It means rather that glowing beauty should be contrasted with a quieter loveliness. Better than anything else that you can use, the orderly Hyacinth will provide this contrast.

The Hyacinths, with their soft colors and orderly habit, have a very special beauty of their own and they have in addition delicious scent—the only spring flowering bulbs that have it in any appreciable degree. Being conventional flowers, they are best planted in rather formal groupings—beds, or borders of a more or less geometrical form.

All Hyacinths may be grown in the house during the winter months.

FOR SUGGESTIVE LAYOUTS SEE PAGES 4 AND 40

For best effects allow four bulbs for each square foot to be planted.

First Size Named Hyacinths

"TOP ROOT, EXHIBITION MOTHER BULBS"

25 or more Hyacinths will be supplied at the hundred rate.

	Each	Doz.	100

HYACINTH ROSEA MAXIMA

SINGLE MIXED HYACINTHS

A Real "Buy"

For those who want a real flower at little cost, Elliott's Single Mixed Hyacinths are impossible to beat. Considering their price, these are really unusual bulbs, and while they should never be forced, you will find it pretty hard to stop their growth if you plant them outside. We anticipate a heavy demand for this bulb this season.

MINIATURE HYACINTHS FOR FORCING

Long experience has convinced most garden lovers that Roman Hyacinths are much too high priced for their mediocre quality. Instead experienced planters are using the Single Small Forcing Hyacinth with results that are highly gratifying. Costing less than half the price of Roman, they give a flower of about the same size with larger bells and a great deal more strength. We are offering in this section only those varieties which produce the finest flowers and force easily, blooming early in January. This bulb was one of our best sellers last year.

	Per Doz.	Per 100

Forcing Hyacinths Grow Easily

Elliott's Superb Bedding Hyacinths

THESE special Bedding Hyacinths are selected for uniformity in color, height and time of bloom and are specially packed for those who require a higher grade bulb and can be furnished in a mixture. They may be used for formal garden planting with every assurance that when they are in bloom, the design will not be ruined by having Flowers of unequal height, differences in blooming time, weak stems or color clashes.

	Per Doz.	Per 100

ELLIOTT NURSERY CO., Pittsburg, Pa.

Dear Sir:—The Hardy Phlox which I ordered from you, came today, and as usual I am well pleased, as I am with every thing I get from "ELLIOTTS", I want to tell you that the tulips I bought from you last fall are beautiful, and look just like the pictures, I can never praise "ELLIOTTS" enough. I remain,

A satisfied customer,—MRS. L. C. SHANNON

Bedding Hyacinths

GARDEN GROUP 7

The accompanying diagram and illustration shows a most effective planting of Bedding Hyacinths occupying an area of 40 square feet. This is the equivalent of a circle 7½ feet in diameter and the bulbs offered in this group may be used in a circular bed if preferred. For summer planting, after the Hyacinths are finished blooming, the bed will be very effective if planted with Improved Giants of California Asters.

Bedding Hyacinths Group 7

- A—55 Bedding Hyacinths Pink.
1 pkt. Improved California Giant Double Aster, Deep Rose.
- B—65 Bedding Hyacinths Yellow.
1 pkt. Aster White.
- C—55 Bedding Hyacinths Light Blue.
1 pkt. Aster Light Blue.

In summertime when all growing things are in full leaf they are not obvious—those patches of poor tortured grass or none, under your trees and shrubs; but in early spring before the foliage appears, they obtrude most painfully, giving an impression of neglect.

This need not be. The little group of spring flowering bulbs shown on this page may be planted under your trees and shrubs, where they will bloom and be gone before the foliage hides them. They may also be used for planting in the rockery or for edging, if you prefer them to crocus. If the foliage is not cut they will last indefinitely.

FOR SUGGESTIVE LAYOUT SEE PAGE 4

For best effects allow seven to nine bulbs for each square foot to be planted.

MISCELLANEOUS BULBS

	Per Doz.	Per 100
CHIONODOXA (Glory of the Snow). Used largely for naturalizing. Very pretty blooms early in April.

Anybody Can Grow Elliott Bulbs

WINDOW DECORATION WITH ELLIOTT'S BULBS

From Christmas Until Easter Flowers in the Home, Flowering Bulbs for House Culture

WITH only such facilities as every home has, and with about as much trouble as it takes to keep the eight-day clock running, one may, by selecting bulbs in the proper classes, have flowers to bloom in the house all winter. The amount of skill required is so little that a twelve-year-old school girl should be able to do it as well as the most experienced professional. The flowers produced are among the finest known to floriculture and you purchase exactly similar flowers all winter in the florists' shops at three times as much as it would cost you to grow them yourself.

If you are a beginner you will, of course, want some Hyacinths, since there is nothing easier to grow. You may use anything in the first sized named Hyacinths (Page 36), the Miniature Hyacinths (Page 38), or the Special Prepared Dutch Hyacinths for very early bloom, listed on next page. Equally easy are the Single Early and the Double Early tulips (Page 25). The Triumph Tulips (Page 28), grow as easily as the Early sorts (Page 23). The Mendel Tulips (Page 25), have been developed specially for forcing and are easiest of all to grow in this way. Then there is the Narcissus (Page 47), which seem almost to grow themselves. There are also the Lily of the Valley and the Calla Lilies which require hardly enough attention to make the experience interesting.

The Freesias are a little more difficult, though still quite simple. The Lilies require some skill and the beginner should prepare himself for some disappointment the first time he attempts to grow them. Among late flowering

5% Discount for Cash Before July 1st, 1929

Tulips the Breeders (Page 11) and the Darwins (Page 6) may be forced but to force them successfully requires real skill. Consequently, unless you are sure of your ability you had better stick to early Tulips and not try the Darwins and Breeders.

For your convenience we are listing below some of the more popular varieties. However, if you prefer others you may make your own selection. Keeping in mind what we have said above, you cannot possibly make a mistake.

FREESIA PURITY

LILY-OF-THE VALLEY

CALLA LILIES

White Calla (Richardia Aethiopica). Each Doz. 100
The White Calla, or Lily of the Nile, is a well known plant of easy culture, and in Winter is one of our best window plants. To aid profuse blooming keep them dormant from the middle of June until the last of August; repot in good, rich soil, using 6 to 8 inch pot; give water, light and heat in abundance, and the result will be most satisfactory.

Selected Bulbs	\$0.25	\$2.50	\$18.00
Mammoth Bulbs30	3.25	24.00

Yellow Calla (Elliothiana). The flowers are a magnificent deep golden yellow and the green foliage is spotted creamy white. Unquestionably the most beautiful of the Calla Lilies.

Select Bulbs30	3.00	20.00

Keep a Copy of Your Order

LILIUM CANDIDUM (MADONNA LILY)

The Beauty of the Lily—Flower of the Ancients

FROM the earliest beginning of garden literature, the Lily has been highly esteemed. It is the most prized of all flowers today. True, there are easier flowers to cultivate; but perhaps we appreciate it the more for that. Unlike the tulip or the narcissus, which anyone can grow, a perfect lily is rarely produced by accident. It is a result of care and skill. It represents a triumph over conditions that most of our neighbors will not take the trouble to understand. Whoever has planted and tended it may indulge a little in the pride of achievement.

Yet lilies are not unduly hard to grow. A little study of their native habits, a little attention to the proper choice of varieties, a little effort to give these the degree of sun and shade, of drainage and of moisture to which they are adapted, and they will reward the gardener with miracles of exquisite bloom.

JAPANESE LILIES

	Each	Doz.	100		Each	Doz.	100
Auratum. Gold-banded Lily of Japan. Large and graceful flowers of delicate ivory-white, closely dotted with chocolate-crimson spots; the center striped golden yellow; a truly gorgeous creation; 3 to 4 feet. Flowers in August.				Longiflorum. Pure white, trumpet-shaped flowers, similar to the Bermuda Easter Lily. Excellent for cutting. June and July.

Please Read Page 39

Because of transportation difficulties, Japanese Lilies frequently do not arrive in time for Fall planting, in which event we carefully pack them in sand and store them until Spring when they are distributed.

European Grown Lilies

Brownii. Massive, deliciously fragrant flowers which open pale yellow fading to a creamy-white. The outside of the trumpet is streaked with reddish-brown. Grows 3 to 4 feet tall and blooms in July. The favorite lily of our President who considers it the most exquisitely beautiful lily in cultivation..... \$3.50

CANDIDUM: The Ancient Easter Lily.

The beautiful and historic Easter Lily needs no introduction here, for, although the horticulturists call it *Lilium Candidum*, it is known all over the world as the Annunciation or Madonna Lily. Notwithstanding its rich beauty, many flower lovers deny themselves this fragrant Lily because of the incorrect belief that it must be planted early in September. At our own Nursery we have planted as many as 10,000 in November to get beautiful blooms the following June, when we sold them to wholesale cut-flower buyers for double the price of the original bulbs! Elliott's *Candidum* bulbs are really the finest that come to America, being grown only in the north of France.

Selected bulbs35	3.50	25.00
Extra large selected bulbs.....	.45	4.50	35.00

Each Doz. 100

TESTACEUM (Excelsum) NANKEEN LILY

Lilium Testaceum. Resembles more nearly than any other lily a yellow *Lilium Candidum*. In favorable situations it will grow from 6 to 7 feet tall and it is the most graceful of all the lilies and its yellow color is exquisite beyond description. The bulbs are very scarce and orders for *Lilium Testaceum* will be filled in rotation as received and we cannot guarantee to fill late orders. Extra select bulbs..... \$2.50

Each Doz. 100

NATIVE and AMERICAN-GROWN LILIES

Batemanii. A vigorous, sturdy lily growing from 3 to 4 feet, bearing from 5 to 10 splendid reddish-orange flowers in July and August.	.45	4.50	35.00
Canadense Flavum. The beautiful native Lily, with graceful, charming, yellow flowers.	2.50	18.00	
Canadense Rubrum. Similar in all respects to the preceding variety, save that the flowers are red....	3.00	20.00	
Canadense, Mixed. Flowers of various shades of yellow, orange and red, spotted with black and brown. Excellent for mass plantings or shrubbery borders, first size bulbs.	2.50	18.00	
Elegans, Leonard Joerg. Rich apricot blooms, attractively spotted and dotted.	3.50	25.00

LILIUM REGALE

A Lily for Forcing or Outside Planting

The center of the flower is flushed with yellow, shading to white at the outer edges. Externally the flowers are streaked with brown shaded through the almost translucent petals with a delightful pearly tint. A truly royal lily and most extraordinarily beautiful. It has the merit of being hardy and as easy to grow as a carrot. It will grow anywhere, under almost any conditions and with no attention whatever. Its height is 4 to 5 feet and blooms in July. Because of its great beauty and exceedingly easy culture it is the most popular of all the lilies and the lily most widely planted. It may also be forced.	Each	Doz.	100
Selected Bulbs	\$0.50	\$5.00	\$40.00
Extra Selected Bulbs75	7.50	60.00

SUPERBUM—The Lily that Defies Neglect!

Superbum is unquestionably one of the most satisfactory and unusual lilies. It can be planted in the garden or the meadows; in wet swamps or dry ground; on the edge of the woods or in cultivated ground. It will thrive wherever you put it—and it will grow without care or attention! On top of all this it is truly a superb lily, as its name suggests; it often grows over eight feet high, producing 20 to 30 orange-red flowers in the one month when flowers are apt to be scarce—July. By virtue of our yearly contract to have 25,000 of these grand Lilies grown especially for us, we are able to offer them at a price low enough to make it available for naturalizing in quantities. Extra Selected Bulbs	3.00	20.00
250 for \$45.00; 500 for \$80.00; 1000 for \$150.00.

Pot Plants for Immediate Delivery

For the convenience of people who wish to plant in May and June, we have prepared the following plants for delivery during these months. The majority of them are pot-grown and the others have been prepared for transplanting. Stock offered in this list will be delivered immediately on receipt of order. Bulbs offered in this Catalogue will not be delivered until Fall.

ANEMONE JAPONICA (Japanese Anemone)

	Per 12	Per 100
†Alba. The blooms of this variety are snowy white, and are borne from August until well into November. 3 to 5 feet.....	\$2.50	\$18.00
†Queen Charlotte. If roses and anemones could bloom at the same time, this variety would be a strong rival of the pink La France rose, at least so far as excellence of color is concerned. The soft, silvery pink, combined with the substance of the bloom, makes this Japanese Anemone of superior value for cutting	3.00	20.00
†Whirlwind. One of the latest introductions in the Anemone family, but has made a permanent place for itself. The flowers are fully as large, or even larger, than those of the other varieties, pure white, and produce very freely	2.50	18.00

ANEMONE "HUPEHENSIS"

This dependable hardy variety in a miniature way closely resembles Anemone Japonica, grows from 18 to 24 inches high and produces in great abundance pleasing mauve-rose flowers about 1½ inches in diameter; it is in flower from the middle of August until late in the Fall. \$2.50-\$15.00.

ANCHUSA ITALICA (Dropmore Variety)

A grand improvement on the original type of A. italica, or Italian Alkanet, and a plant which, on account of its remarkable freedom of flowering and its beautiful blue color, is sure to become one of our most popular hardy perennials. It attains a height of 5 to 6 feet and produces its pretty blue flowers, which are from 1 to 1¼ inches in diameter, throughout the entire summer. 25 cts. each; \$2.50 per doz.; \$15.00 per 100.

NEW ASTILBE ARENDSI

This new type is the result of crossing A. Davidii with A. japonica compacta, astilboides, and A. Thunbergii. The plants are of very vigorous growth, 2½ to 4 feet high, producing many branched, feathered heads of flowers. They prefer a half-shady, moist position in any ordinary garden soil.

Pyramidalis. Pure white. 50c each; \$5.00 per doz.

Thunbergi, Moerheimi. A new variety introduced from Europe. The panicles are extremely large, but the flowers are quite small and pure white. July. 50c each; \$5.00 per doz.

Pink Pearl. Smaller panicles but many of them; clear, deep, rose-pink. June, July. 3 feet. 50 cts. each, \$5.00 for 12.

ANTIRRHINUM (Tall Snapdragon)

The colors are radiant with feeling, blending all the dainty fine hues with a passionate crimson that actually seems to throb with emotion. No flower garden is complete without these; and no persuasion is necessary to induce the owner of a garden to cultivate them. They belong to the inner circle of genuine friends, tested by time and permanently loved. A very pretty effect is made by blending the tall and the semi-dwarf. Half-hardy perennials.

	Yellow	White
	Pink	Scarlet
	Coppery	
	Per doz.	Per 100
3-inch pot plants.....	\$1.75	\$12.00

BAMBUSA JAPONICA (Metake of Gardens)

One of the best known of all the hardy Bamboos. The stems are often 15 feet high, with internodes 6 to 9 inches long, and with tapering leaves a foot long, smooth and shining above, glaucous beneath. It forms fine clumps when sheltered from the East wind, and will grow in drier situations than most Bamboos. Large plants, \$1.50 each; doz., \$15.00.

BUDDLEIA—BUTTERFLY BUSH

An attractive new introduction from China. It is considered a herbaceous shrub because part of the tops are Winter-killed; however, vigorous new growth is made in the Spring from the living stems and from the roots. Plants of this family are particularly valuable in that they furnish a profusion of bloom in August and September. The long, narrow panicles of bloom are sometimes a foot or more in length. In general color and effect it resembles the common lilac.

Davidi magnifica. Attractive light blue. Fine plants. 50 cts. each; \$5.00 per doz.

CALIMERIS INCISA

Grows readily in any good soil, and is an extremely dainty little perennial. The flowers are white or slightly tinged with purple and have a bronzy yellow center. 1 to 2 feet. July and August. \$2.50 per doz.; \$15.00 per 100.

CAMPANULA

Carpatica (Carpathian Bellflower). A charming little plant growing from 6 to 12 inches high, producing the bell-like blue flowers all Summer. Especially useful in rockwork. \$2.50 per doz.; \$15.00 per 100.

Carpatica alba. White form of preceding variety. \$2.50 per doz.; \$15.00 per 100.

Persicifolia (Peach-Leaf Bellflower). Glossy green foliage from which it takes its common name. Flowers are blue, shading to white. 2 feet. June \$3.00 per doz.; \$18.00 per 100.

Persicifolia alba. White form of persicifolia. \$2.50 per doz.; \$15.00 per 100.

CERASTIUM

Biebersteini (Improved Snow-in-Summer). A low-growing plant which bears a multitude of small, white flowers. The foliage is silvery white and the entire plant makes a desirable edging or carpeting for borders and beds; it is attractive throughout the entire season. \$2.50 per doz.; \$15.00 per 100.

CENTAUREA (Perennial Cornflower)

Montana. Grows 2 feet high, bearing large, violet-blue flowers from July to September. \$2.50 per doz.; \$15.00 per 100.

Montana alba. A white variety of the above. \$2.50 per doz.; \$15.00 per 100.

POMPON CHRYSANTHEMUMS

These are the small-flowered Chrysanthemums of the old-fashioned gardens, and bloom in October and November, after almost all flowers are gone. They are showy in the garden and effective as cut-flowers, and being perfectly hardy and of easiest culture, can be successfully grown in any garden. We offer a fine collection of the best varieties, ranging from white to deep crimson.

Plants, \$2.25 for 12, \$14 per 100

- Autumn Glory.** Beautifully formed flowers of rich golden yellow, with brownish tinted centers.
- Capt. R. H. Cook.** Tall, rather small-flowered variety of rich, dark flesh-pink, with the petals fringed at the tips and tinted with old-gold toward the center. A favorite everywhere.
- Carmelite** (Glory of Seven-Oaks). Another fine and very popular pure golden yellow variety, which blooms early and profusely.
- Doris.** Fine bronzy variety with very short petals, making perfect, compact blooms. Popular.
- Golden Climax.** A bushy, medium-high sort with great quantities of splendid orange-yellow flowers. Rather late-blooming.
- Klondike.** A true Pompon with rather small blooms of brilliant yellow. Showy and dependable.
- Lillian Doty.** Unquestionably the finest and most popular of all pink Pompoms, and larger than most, blooming in very compact clusters. Rich flesh-pink with a cream undertone. Early, and always dependable. Tall.
- Marie Antoinette.** A very dark pink flower of substance and high quality.
- Mitzi.** Yellow flowers of small or medium size, with red centers before fully open. Very attractive and decorative.
- Mrs. Nellie Kleris.** A darker pink than Lillian Doty, with a white undertone instead of cream. Very handsome and one of the best in masses.
- New York.** Small, button-like flowers of bright yellow and old-gold, tinged with bronze and crimson. Dwarf.
- Petit Louis.** Flowers large, loosely built, and of soft, silvery mauve-pink. Medium height.
- Provence.** Very early-flowering; large, double flowers of starry shape, pale pink at first but quickly turning pure white. Dwarf and bushy.
- Red Button.** Dwarf, button type. Dark bronzy red. Early flowering and very decorative.
- Red Doty.** Lillian Doty type, rosy gray on outside and dark crimson within. Splendid habit, and profuse bloomer. One of the best red varieties.
- Rose Trevenna.** A large-flowering type, with deep rose-pink flowers. Midseason; modern height.
- Skibo.** A bright yellow variety of medium size, occasionally tinted rust-red in center.
- Varsity.** Button type. Early; rich deep yellow.
- White Doty.** Exactly like Lillian Doty in shape of flower, but clusters more compact, and pure creamy white, almost cream-yellow in the center. Early flowering, very dependable, and handsome.

DELPHINIUM

- Chinense.** Fine feathery foliage and intense gentian-blue flowers in open panicles. \$2.50 per doz.; \$15.00 per 100.
- Chinense Album.** A pure white form of the above. \$2.50 per doz.; \$15.00 per 100.

DIGITALIS—FOXGLOVE

The Shirley

The Shirley Foxglove is a magnificent new strain produced by the late Rev. W. Wilkes. It produces plants 5 to 7 feet high with spikes 4 feet long, carrying flowers of great size, ranging from white to dark rose, handsomely blotched and spotted with crimson, maroon and chocolate. It is, of course a hardy perennial. \$2.75 per doz.; \$18.00 per 100.

Purpurea. The old-fashioned purple Foxglove. The flower spikes are from 4 to 7 feet tall, coming to perfection in July. \$2.50 per doz.; \$15.00 per 100.

Purpurea alba. White form of purpurea. \$2.50 per doz.; \$15.00 per 100.

DIANTHUS

Deltoides (Maiden Pink). Dainty border plant. Flowers deep red with crimson eye. \$2.50 per doz.; \$15.00 per 100.

DICENTRA

Eximia (Fringed Bleeding Heart). Almost a perpetual bloomer, as the flowers are produced all Summer; foliage fernlike. \$3.00 per doz.; \$20.00 per 100.

HARDY FERNS

Varieties marked (*) require shade; those marked (†) succeed in open border.

	Per 12	Per 100
* <i>Adiantum pedatum</i> (American Maidenhair Fern)	\$2.50	\$18.00
† <i>Athyrium filixfemina</i> (Lady Fern)	2.50	18.00
† <i>Dennstaedtia punctilobula</i> (Hay-Scented Fern)	2.50	18.00
* <i>Dryopteris goldiana</i> (Goldie Fern)	2.50	18.00
* <i>marginalis</i> (Leather Fern)	2.50	18.00
† <i>Osmunda cinnamomea</i> (Cinnamon Fern)	2.50	18.00
† <i>claytoniana</i> (Interrupted Fern)	2.50	18.00
† <i>regalis</i> (Royal Fern)	2.50	18.00
* <i>Polystichum acrostichoides</i> (Christmas Fern)	2.50	18.00
† <i>Pteritis nodulosa</i> (Ostrich Fern)	2.50	18.00
* <i>Woodsia obtusa</i> (Common Woodsia)	2.50	18.00

FESTUCA GLAUCA (Blue Fescue Grass)

A dwarf grass with very distinct blue foliage. Does not grow over 8 to 10 inches high and is very effective. \$2.50 per doz.; \$15.00 per 100.

GAILLARDIA (Blanket Flower)

IMPROVED. *Gaillardia aristata*. Gold and orange-red flowers of great boldness and beauty. Fine for cutting. July-September. 2 feet. \$2.50 for 12, \$15.00 per 100.

PORTOLA HYBRIDS. *G. aristata*. Larger flowers than the type with fine clear crimson greatly predominating in the color. July-September. 2 feet. 30 cents each, \$3.00 for 12, \$20 per 100.

GENISTA ELATIOR (Hardy Broom)

At last we have a Genista, or Broom, that is perfectly hardy in this climate. All know the yellow-flowered Genistas that the florists sell for Easter at prices ranging from two to ten dollars each. This hardy Genista is just as beautiful as these and can be grown in anyone's garden or shrubbery. It is of slow growth, but eventually reaches a height of 3 to 4 feet and as many feet across. In June it is covered with beautiful yellow, pea-shaped flowers which continue a long time on the plant. We consider this one of the most valuable small shrubs introduced during many years. Pot-grown plants, 50 cents each; \$5.00 per doz.

IBERIS (Candytuft)

- Saxatilis corifolia.** Candytuft. A large snow-white flower. 8 to 10 inches. May. \$2.50 per doz.; \$15.00 per 100.
- Sempervirens.** Hardy Candytuft. The flowers are white, borne with great freedom, while the foliage may remain green all winter. About 1 foot. April to June. \$2.50 per doz.; \$15.00 per 100.
- Sempervirens nana.** A dwarf form of the preceding. \$2.50 per doz.; \$15.00 per 100.

KNIPHOFIA—TRITOMA (Flame Flower, or Torch Lil;)

This new Tritoma is undoubtedly one of the most valuable introductions of recent years. Tritoma Uvaria, or "Red-Hot-Poker" plant, is highly prized on account of its picturesque appearance and its blooming so late in the fall after almost everything else is gone. This new variety is a great improvement in every respect. The flowers are much more refined and beautiful and are produced in the greatest profusion from early summer until late fall, coming into bloom at least two months before the older variety. It is equally desirable for garden effects or for cut-flowers. The flower-spikes are of gigantic size, frequently 4½ feet high, with heads of bloom over 12 inches long, of a rich orange-scarlet, shading to salmon-rose on the edge; a first-class acquisition. This plant is not quite hardy and should be protected in winter with a covering of leaves, or can be taken up, packed in sand and stored in a cold cellar over winter. 35 cents each; \$3.50 per dozen; \$25.00 per 100.

LYCHNIS VISCARIA SPLENDENS FLORE PLENO (Double Rose-pink Campan)

Double Red (Ragged Robin). Forms a dense tuft of evergreen foliage, and in June it sends up tall spikes of handsome double, deep red flowers of exquisite fragrance, and remains in perfection six weeks. 25 cents each; \$2.50 per doz.; \$15.00 per 100.

MERTENSIA VIRGINIA (Blue Bells)

An early spring-flowering plant, growing about 1 to 1¼ ft. high, with drooping panicles of handsome light blue flowers, fading to clear pink. One of the most interesting of our native spring flowers. May and June. 25 cents each; \$2.50 per doz.; \$15.00 per 100.

MYOSOTIS

Scorpioides semperflorens (Dwarf Perpetual Forget-me-nots). An improved variety of the old-fashioned true Forget-me-not. The plants require a rather damp, shaded place. Flowers bright blue; borne all Summer. 8 inches. \$2.50 per doz.; \$15.00 per 100.

OENOTHERA

Fruticosa Youngi (Young's Sundrops). Extremely profuse bloomer, bright lemon-yellow flowers. Plant branching, about 2 feet high. \$2.50 per doz.; \$15.00 per 100.

Glaucia Fraseri (Fraser's Sundrops). Flowers are yellow, quite large, and borne in clusters. 2 to 3 feet. Midsummer. \$2.50 per doz.; \$15.00 per 100.

PACHYSANDRA

Terminalis (Japanese Spurge). A valuable plant for covering the ground in shady places, but seems to grow well in the sun. The foliage is a bright glossy green, while the plant is rarely more than 6 inches high. Small spikes of flowers are borne during the months of May and June. \$2.50 per doz.; \$15.00 per 100.

PENTSTEMON

Torreyi (Torrey Pentstemon). An excellent variety of this American plant that is used chiefly for garden borders. The flowers which are scarlet or crimson and orange, are produced freely in June and July. \$2.50 per doz.; \$15.00 per 100.

Florist's New Giant. A fine improved race of Pentstemon of more erect habit than the older strain and with very large flowers, ranging in color from bright and rich reds to rose, violet, and white. Hardy perennial but needs protection during the Winter north of Pennsylvania. \$1.75 per doz.; \$12.00 per 100.

PENNISETUM JAPONICUM

This new Hardy Grass is very desirable. It grows 4 feet high, with slender, graceful foliage and showy plumes thrown well above the leaves. Most valuable for adding variety to the garden planting. 25 cts. each; \$2.50 per doz.

KARLSRUHE BALCONY PETUNIAS

Several years ago, while motoring in Germany, we saw the most beautiful Petunias trained on the iron railings of the balcony of the town hall of Karlsruhe. It was the most effective balcony decoration we had ever seen. There was only one color—a lovely rich violet-blue, a color never seen in Petunias before. The front of the balconies was a solid sheet of color. Inquiry developed that these remarkable Petunias were being shown by a local specialist. We were unable to obtain any seed until a few years later when we got a small quantity.

Violet Blue
Carmine

Pure White
Rosy Pink

3 inch pot plants \$1.75 per doz.; \$12.00 per 100.

PRIMULA POLYANTHUS

This charming Spring-blooming plant belongs to the Primrose family, the hardy varieties of which are so very popular in England, but are rarely seen in this country, owing partly to an impression that they cannot be grown in this climate. This is a mistake, as they do very well here. For the front of the borders and shrubbery, for Spring bedding, and for naturalizing in moist and partly shaded places nothing can be finer.

Large-Flowered White. An improved variety with very large flowers; very fine. \$2.50 per doz.; \$15.00 per 100.

Large-Flowered Mixed. \$2.50 per doz.; \$15.00 per 100.

Cashmeriana. Large-leaved variety, as hardy as it is handsome, and when planted in moist, rich loam, grows as vigorously as a cabbage. \$3.00 per doz.; \$20.00 per 100.

PHYSOSTEGIA VIRGINIANA

False Dragon. An American plant forming large clumps, which in July and August are covered with light pink flowers. \$2.25 per doz.; \$14.00 per 100.

POLEMONIUM CERULEUM

(*Jacob's Ladder*)

Useful border plants about 12 inches high, with deep green, finely cut foliage and spikes of showy blue flowers in May and June; of graceful growth. \$2.50 per doz.; \$15.00 per 100.

PLUMBAGO LARPENTAE

A dwarf plant covering the ground completely with its foliage. In September it is a mass of beautiful, deep blue flowers, which gradually change to violet. \$2.50 per doz.; \$15.00 per 100.

HARDY PERENNIAL PHLOXES

The beauty and usefulness of these grand border plants give to them a deservedly first place among hardy plants. For cutting, their large trusses go a long way in floral decorations. In color they range from pure white to the richest coral-red, all having a delicate fragrance. Perennial Phloxes succeed in almost any soil enriched with manure, but are much benefited by a mulching of decomposed manure in spring, and in hot weather an occasional soaking of water. If the first spikes of bloom are removed as soon as over and the plant given a good soaking of water, they will produce a second supply of flowers, thus continuing the display until late in autumn. These later blooms are often finer than the first.

Pot-grown plants, 25 cts. each; \$2.50 per doz.; \$15.00 per 100.

Albion. Pure white, with a faint red eye.

Beacon. Brilliant cherry-red. Grows 36 inches high. The flower heads are carried on straight, strong stems. It is an excellent variety and one of the best of this color.

Europa. White with crimson eye. Extra large. Distinct and fine.

Jules Sandeau. Rather dwarf in habit, but producing very large heads of brilliant watermelon-pink blossoms. An outstanding variety because it flowers more freely and longer than most Phlox.

Kossuth. Deep rose, maroon center.

La Vague. Warm mauve-pink with red eye. This Phlox does not look nor create the effect that the so-called wild or purple Phlox does. The flower heads are conical and large, and borne in great profusion.

Miss Lingard. Early-flowering; pure white blooms with a faint lilac eye. Splendid for mass planting, as it will bloom in June and again in September, if the old flowers are cut. Not infested with red spider.

Mrs. Scholten. New dark salmon-pink flowers in enormous pyramidal spikes. A splendid sort of great value. Mid-season flowering and of medium height.

Richard Wallace. White with crimson eye. Splendid.

Rynastrom. Rose-pink; flowers and trusses extremely large; possibly the finest Phlox of this color.

Rhineland. Salmon-pink; both flower and truss are immense in size, and the color is intensified by a brilliant carmine eye.

Thor (Medium). A most beautiful and lively shade of deep salmon-pink suffused and overlaid with a scarlet glow.

ROSMARINUS

Officinalis (Rosemary). A shrubby perennial from 2 to 4 feet high, with many small light blue flowers. Familiar in old-fashioned gardens. \$2.50 per doz.; \$15.00 per 100.

SALVIA (Scarlet Sage)

Improved Dwarf. Spikes of brilliant scarlet flowers. \$1.50 per doz.; \$10.00 per 100.

Splendens. The old-fashioned, tall-growing variety. \$1.50 per doz.; \$10.00 per 100.

SEDUM—STONECROP

A showy group of hardy perennials which anyone can grow and which we have divided into two classes:

THE CREEPING STONECROPS

Are seldom over 6 inches high; excellent for edging perennial beds and carpeting the ground between shrubs.

Sieboldi (Siebold Stonecrop). This Japanese variety, with its exquisite glaucous leaves, is considered the best foliage plant in the Sedum family. Flowers rosy pink. \$3.50 per doz.; \$25.00 per 100.

Spectabile (Showy Stonecrop). Glaucous foliage; flat clusters, about 4 inches across, of rose or light purple flowers. 1 to 3 feet, September and October. \$2.50 per doz.; \$15.00 per 100.

Stoloniferum (Running Stonecrop). Pink flowers in June and July. \$2.00 per doz.; \$12.00 per 100.

THE MOSSY STONECROPS

Acre (Gold Moss). Grows 2 to 3 inches high; yellow flowers in July; leaves are $\frac{1}{4}$ inch long. \$2.00 per doz.; \$12.00 per 100.

Album (White Stonecrop). Small white flowers. \$2.00 per doz.; \$12.00 per 100.

Reflexum (Jenny Stonecrop). Small, bright-yellow flowers making up a flat cluster 1 to 1½ inches across. July. \$2.00 per doz.; \$12.00 per 100.

SILENE

Schafta (Schafta Catchfly). A low-growing plant with rose-pink flowers in clusters. Useful for edging and the rock garden. June to September. \$2.50 per doz.; \$18.00 per 100.

STENANTHIUM ROBUSTUM (Mountain Feather Fleece)

This remarkably hardy perennial is without doubt one of our best new introductions and may be classed with the showiest of all herbaceous plants. As the buds begin to unfold, they are quite upright, and of a light green tinge gradually becoming whiter until at last they burst forth into a veritable snowbank of drooping, fleecy bloom of the purest white, the panicles often 2 to 3 feet long. After several weeks the flowers, as they ripen, turn to shades of pink and purple. It is a vigorous perennial, attaining a height of 5 to 8 feet, and is absolutely hardy throughout the United States and Canada.

The Mountain Feather Fleece is of easy cultivation, but takes some time to become well established, and if given plenty of food, makes a wonderful show, equaled by few plants of any description. Prefers a moist and partially shaded position. It would be impossible to give an idea of the wonderful effect of a large mass of *Stenanthiums* when in full bloom, as no description conveys the beauty of the delicate feathered, drooping flowers. Strong plants, 35 cts. each; \$3.50 per doz.

HYBRID TEA ROSES EVERBLOOMING

Prices except where noted, for strong, 2-year field grown plants in pots
\$1.00 each; \$10.00 per doz.

Briarcliff. Exquisitely shaped buds and blooms of brilliant pink. Rapidly becoming one of the most popular garden Roses as its merits become known.

Columbia. An old favorite. The blooms are very heavy, double, and bright, light pink, deepening in the sunlight as they open.

Dame Edith Helen. New. A novelty which has created a sensation in all the recent flower shows and has shown up well in gardens the past season. The flowers are extremely double, exquisitely formed and delicately fragrant. \$2 each.

Dorothy Page-Roberts. A very attractive copper-pink variety which blooms unceasingly throughout the season.

Duchess of Wellington. Lovely, long copper-yellow buds which open to very large, semi-double flowers of pale cream.

Frank Reader. New. Exquisitely shaped buds of light yellow, opening to fine, double flowers of the same color with darker centers. \$2 each.

Gruss an Teplitz. Strong, shrubby plants suitable for borders and backgrounds in the Rose garden, covered continuously with drooping clusters of medium-sized, intensely fragrant Roses of rich velvety crimson.

Hadley. A splendid little bush bearing glorious dark red blooms on long, strong stems.

Irish Hope. New. A novelty of the past few years which has attracted a great deal of attention because of its brownish red buds and exquisitely formed, rich crimson bloom. \$2.50 each.

Jonkheer J. L. Mock. A favorite old-time variety with enormous dark pink buds, opening to very large, very double flowers which are pale pink inside and almost crimson on the outside.

J. Otto Thilow. New. Charming sort with bright pink flowers of shell-like form and exquisite texture. Blooms persistently and has excellent stems for cutting. \$2 each.

Kaiserin Auguste Viktoria. An old and very popular white Rose whose flowers are the most perfectly formed of any grown.

Killarney. A few years ago the most popular Rose in the world because of its long, slender, brilliant pink buds and widespread semi-double flowers.

Killarney White. Exactly like Killarney except that the flowers are pure snow-white.

Lady Alice Stanley. A very handsome and dependable old sort, making a strong, robust bush with husky foliage and very large, very double, beautifully formed flowers of light and dark pink. Favorite in everybody's garden.

Lady Margaret Stewart. New. Gorgeous, long-pointed buds of deep golden yellow, strongly stained with copper and red, opening to very double, pure yellow flowers of great size. Indications are that it will be a popular garden Rose for many years to come. \$2.50 each.

Lord Charlemont. New. A brilliant crimson Rose of wholly distinct form and color. \$1.75 each.

Los Angeles. Generally considered one of the most beautiful Roses ever grown. Flowers are pale flesh-pink illuminated at the base with shining golden lights and stained with rose and amber.

Margaret McGredy. New. Robust plants with brilliant green foliage and spiny stems, bearing large globular flowers of most unusual orange-scarlet or brick-red. This variety has attracted more attention in the past two years than any other novelty we have ever seen. \$2.25 each.

STOKESIA CYANEA

(Cornflower Aster, or Stokes' Aster)

Caerulea. Beautiful light blue. \$2.50 per doz.; \$18.00 per 100.
Alba. Pure white variety of the above. \$2.50 per doz.; \$18.00 per 100.

THALICTRUM

Aquilegifolium (Columbine Meadow Rue). One of the most desirable hardy plants in cultivation. Its fine habit, beautiful foliage, and masses of lovely flowers, varying from white to purple through all intermediate shades, make it one of the most handsome things that can be planted. A graceful plant of much charm and distinction. 2 to 3 feet high; blooms in May and June. \$2.50 per doz.; \$18.00 per 100.

TROLLIUS—GLOBE FLOWER

A family of plants which succeeds well in borders where they may be shaded during the middle of the day. They prefer a light soil and a goodly amount of moisture.

Japonicus (Japanese Globe Flower). Orange-yellow flowers, borne freely in early spring. 40 cts. each; \$4.00 per doz.

Mixed. All colors. 30 cts. each; \$3.00 per doz.

Miss Lolita Armour. Handsome, globular flowers with many petals of soft golden salmon, tinged with rose and yellow. A peculiar and very attractive color combination.

Mme. Edouard Herriot. Most sensational in its brilliant copper-red color, paling as it opens to shining strawberry-pink. One of the most striking Roses ever grown and still very popular.

Mrs. Aaron Ward. A vigorous, low-growing bush with glossy, holly-like foliage, small, frilled buds, and very double, open flowers of apricot-pink and cream. Has long been one of the most popular and widely grown Roses in the garden.

Mrs. A. R. Barraclough. New. Extremely large, lovely blooms of light salmon-pink, beautifully toned and tinged with yellow and deep rose. One of the most persistent bloomers, and the finest novelty of recent years. \$2.50 each.

Mrs. Lovell Swisher. Enormous pale pink flowers, suffused with gold and cream. A new variety from California which is rapidly making a place for itself in the Rose gardens of the East. \$2 each.

Mrs. Wakefield Christie-Miller. A sturdy, stiff bedding Rose of very neat habit, continually producing large, irregular flowers of the freshest frothy pink imaginable. Favorite in every garden and can always be relied upon.

Ophelia. A good deal like Mme. Butterfly but much lighter. In some seasons it is almost white, with just a hint of pink and gold at the base of the petals. It is an extremely popular variety.

Radiance. Perhaps the strongest-growing of the Hybrid Tea class and extremely free-flowering. Blooms are bright pink, globular and almost fully double. Reports from all over the United States place Radiance first in desirability.

Red Radiance. Exactly like Radiance in habit and blooming quality, but the flowers are bright cherry-red instead of pink.

Red-Letter Day. A picturesque shrub, possibly 2½ to 3 feet high, bearing large, starry, single flowers of pleasing scarlet-crimson. An extremely decorative variety in the garden, especially if planted against an evergreen hedge where its brilliant color is seen to best advantage.

Rev. F. Page-Roberts. Deep, golden yellow buds stained with crimson and copper, opening into large apricot and golden yellow flowers of the most perfect shape and delicious perfume. It is particularly handsome in autumn. \$2.50 each.

Souvenir de Claudius Pernet. A clear light yellow Rose which has been extremely popular in the past few years. The plant is very satisfactory and the foliage especially fine.

Souvenir de George Beckwith. A tall variety with large, extremely well-shaped blooms of soft salmon-pink.

Souvenir de Georges Pernet. Short, stocky plants with numerous stiff stems crowned with gigantic, brilliant, orange-pink blooms of very fine form. One of the largest Roses and exceedingly striking.

Sunburst. An old-time pale yellow Rose with a slightly deeper center.

William F. Dreer. An exquisitely beautiful Rose of the Los Angeles type, but much lighter and generally more strongly tinged with yellow.

Willowmere. Beautifully formed flowers of bright coral-pink, illumined with gold and yellow at the center. This is the best variety to grow if Los Angeles fails. They are not exactly alike but Willowmere is generally easier to grow.

TERMS OF PAYMENT, Etc.

Please read before ordering

HYACINTHS, Tulips, Crocuses, etc. The prices quoted in this list on all Dutch Bulbs, Bermuda Lilies and other bulbs are for advance orders, which must reach us not later than July 1, 1929. To make these very low prices, we must have our orders in advance, as we cannot take any risk of having stock unsold on our hands. The bulbs will be delivered upon arrival, and need not be paid for until after delivery. Prices quoted include duty and all charges, except freight, expressage, or postage, from Pittsburgh. On small lots of bulbs sent by mail, postage will be charged at cost, including insurance.

TIME OF DELIVERY: Bermuda Lilies arrive in August; Roman Hyacinths, Freesias, Candelum Lilies and Paper-White Narcissi in September; Dutch Bulbs, Hyacinths, Tulips, etc., in October. In ordering please state whether you wish your bulbs shipped as they arrive or all in one shipment. In absence of instructions, we will send all bulbs in one shipment, except

Japanese Lilies and Lily-of-the-Valley, which will be shipped upon arrival, in November, December, or the following Spring. Transportation conditions are still so unsettled that we cannot guarantee time of delivery, but in the event of late delivery, northern orders will be shipped first, and extreme southern ones last.

SHIPPING

Please send full shipping instructions. State whether goods are to be shipped by express or parcel post, and by what route. In the absence of instructions, we will ship by whatever method and route we think best.

Please print your name and address on your order. Many times it is exceedingly difficult to read these two important points of an order, and a shipment may go astray.

TERMS OF PAYMENT: Our terms of payment are invariably cash on delivery, which does not mean that we ship C.O.D., as we will not do so under any circumstances. We deliver the goods and mail bills at the same time, and expect payment within a few days.

People unknown to us will please send references with their orders. Those who wish to send cash in advance with their orders will be allowed a discount of five per cent. from the prices quoted on this list on all orders made up from this catalog, received before July 1, 1929.

GUARANTEE: We guarantee all trees, shrubs, plants, and bulbs furnished by us to be first class, and true to name.

We do not guarantee stock to grow, or results in any way. No complaint will be entertained that is not made immediately upon receipt of stock.

There are so many causes for failure over which we have no control that we can assume no responsibility after stock is delivered in good order. Poor soil, unfavorable weather, ignorant or careless culture; all contribute to failure, and are all beyond our control.

EARLY ORDERS: The earlier orders are given, the better we can have them filled. Some of our customers are now giving us orders to be delivered next Spring. Our representative usually sails for Europe early in June and personally selects the stock for all import orders received by July 1st.

PRICES: Six plants of a kind will be furnished at the dozen rate; fifty or more at the hundred rate, and five hundred or more at the thousand rate. Less than six plants of one kind or variety will be sold only at the single rate.

CANCELLATIONS: No request for cancellation can be granted after July 10th, when the final orders are sent to Holland.

Import orders taken subject to the failure of the crop.

CULTURAL DIRECTIONS: With each shipment of bulbs we send printed cultural directions, giving full instructions for growing in the house as well as outdoors.

PARCEL POST: Bulbs and plants can now be sent by parcel post, and when it is advantageous we always do so.

Glorify Your Garden with Lovely DELPHINIUM

(Perennial Larkspur)

*Knee high!
Head high!
Ladder high!
Stately—
Exquisite—
Wonderful!
Perennial Larkspur
Most beautiful of plants*

For
September
and
October
Delivery

BLOOMING all summer, coming up year after year, sending aloft successive shafts of incredible color to a height of five, six, eight feet—it is doubtful if any other plant so superb as Delphinium ever graced a garden.

Few people are aware of the perfection to which this ancient flower has been brought by modern culture, how easily it can be planted and grown, and how lasting a delight the gardener secures who plants Delphinium. If everyone knew, tall, hardy Delphinium would be more in evidence everywhere.

* * *

We offer specially selected plants grown from seeds of famous named varieties for autumn planting. Will grow anywhere but do best in rich garden soil. Every imaginable tint and shade of blue, lavender, and purple. We promise you'll find positive joy in their extraordinary bloom. Directions—few and simple—with each shipment.

Elliott's Magnificent Varieties

Improved English Hybrids—Range in color from very light blue to very dark blue, overlaid irregularly with tones of pink and lavender, rose, and lilac. Black spots on pistil and antlers at center of flower. Many blossoms show white secondary petals of white spots at bases of major petals. A wonderful wealth of color variation in the English Hybrids.

Fine Mixed English Hybrids—Dozen Strong Plants \$2.50, Fifty Strong Plants \$7.50, One Hundred Strong Plants \$15.00. Extra-Selected Varieties, each .50 cents. \$5.00 per dozen.

Belladonna—Uniform light sky-blue. The most universally admired and desired of the solid-color varieties.

\$2.50 per dozen, \$7.50 per 50, \$15.00 per 100

Bellamosa—(The improved Formosum)—For solid dark blue color, unequalled among Delphiniums—positively the best.

\$2.50 per dozen, \$7.50 per 50, \$15.00 per 100

*"And larkspurs, many hued, shall drive
Gloom from the groves!"*
